## Mobility and change

The term 'path' simultaneously indicates the act of crossing (the path as the action of walking) the line that crosses the space (the path as architectural object) and the tale of the space crossed (the path as narrative structure).

"...I spend a lot of time walking around the city... The initial concept for a project often emerges during a walk. As an artist, my position is akin to that of a passer-by constantly trying to situate myself in a moving environment.

My work is a succession of notes and guides. The invention of a language goes together with the invention of a city. Each of my interventions is another fragment of the story that I am inventing, of the city that I am mapping."
